Postdoctoral Researcher – Bioinformatician

Aristotle University of Thessaloniki – Department of Chemistry

📅 Nov 2019– Ongoing

📍 Thessaloniki, Greece

- Development of tools for meta-analysis of metabolite identification data, extracted with web scraping and text mining methods from a wide range of academic journals.
- Development of databases of chemical compounds in Greek foods from published data utilizing NLP techniques as well as tools such as Selenium and BeautifulSoup.
- Development and deployment of dash web applications with Plotly Dash and Heroku.
- Development of Machine Learning models for Retention Time predictions of metabolites with Python.
- Development of Health Risk Assessment models from medical data, implementing Regression and Classification algorithms.

Senior Data Analyst – Project Manager

To The point

📅 September 2018 – Ongoing

📍 Thessaloniki, Greece

- Design, implementation and supervision of Market Research and Public Opinion Surveys.
- Data analysis on Market Research and Public Opinion Surveys utilizing various statistical tools.
